SEP 16 1998

FEDERAL COMMUNICATIONS COMMISSION
OFFICE OF THE SECRETARY

Re: MM Docket No. 97-182

Dear Secretary:

I would like to thank you for the opportunity to comment on the petition filed by the National Audubon Society on the need for an Environmental Impact Statement regarding the proposed preemption of state and local land use and zoning regulations during the placement of television, radio, or other communications towers.

Enclosed you will find a petition signed by attendees of the 1998 North American Ornithological Conference in St. Louis, Missouri, held April 6-12, 1998. During this conference four of the largest professional ornithological groups met to discuss the latest issues in the field of ornithology. The four groups are as follows: American Ornithologists Union, Cooper Ornithological Society, Wilson Ornithological Society, and the Association of Field Ornithologists. Each of these professional organizations passed a resolution (see enclosed) addressing the threat television and radio towers present to migrating birds.

I bring this to your attention solely for the reason that the FCC has asked for information regarding, "whether the proposal contained in the Notice of Proposed Rulemaking would have significant environmental effect such that an EIS should be prepared; and second, what would be the environmental effect of the proposal." Given that several hundred individuals and four premier ornithological organizations have deemed the proposed rulemaking a threat to bird populations, I thought it would be valuable for the FCC to have this information. The proposed rulemaking will, by preempting many state and local zoning and environmental laws, have a significant impact by adversely affecting bird populations.

Please take the enclosed petition and resolution into consideration during your proceedings.

Thank you for the opportunity to comment.

Most Sincerely,

Greg Clouser

File of Copies rec'd
17-1-1998

2

COMMUNICATION TOWERS AND AVIAN MORTALITY

WHEREAS an estimated two million to four million birds are killed in collisions with communication towers, particularly those higher than 200 feet, in eastern North America alone each year, and

WHEREAS towers 200 feet and taller are required to be lit for aircraft safety, generally with blinking lights, and

WHEREAS birds migrating at night are attracted by the light and circle the tower striking supporting guy wires; and

WHEREAS there are presently at least 75,000 towers above 200 feet tall in the U.S. (according to the Federal Aviation Administration) and another 100,000 are expected to be constructed in the next decade (according to the communications industry) due to expansion in various communications markets, and to accommodate digital TV;

WHEREAS the accrued impact of thousands of towers on migrant songbird populations may be significant for declining species such as Cerulean Warblers and endangered species such as Kirtland's Warbler,

THEREFORE BE IT RESOLVED that the [organization] urges the Federal Aviation Administration (FAA) to endorse studies involving experiments toward finding lighting systems for towers that reduce avian mortality.

BE IT FURTHER RESOLVED that the [organization] encourages the communications industry to voluntarily reduce the number of new towers by co-locating new transmitters on existing towers and to work with the U.S. Fish & Wildlife Service (USFWS) to minimize collisions of birds with towers;

and be it further RESOLVED that the [organization] strongly encourages the U.S. Fish & Wildlife Service to work with the FAA and the Federal Communications Commission to study the magnitude of the problem, including through preparation of an Environmental Impact Statement, and to develop a national plan to minimize collisions of birds with towers.

Declaration of Concerned Ornithologists
Regarding the FCC's Proposal to Preempt State and Local
Land Use and Zoning Ordinances

Whereas the Federal Communications Commission is seeking public response to the Notice of Proposed Rulemaking (FCC No. 97-296, MM Docket No. 97-182);

Whereas the Federal Communications Commission (FCC) is seeking public response to National Audubon's petition for an Environmental Impact Statement;

Whereas the FCC seeks information "...as to first, whether the proposal contained in the Notice of Proposed Rule Making would have a significant environmental effect such that an EIS should be prepared; and second, what would be the environmental effect of the proposal";

We, the undersigned, hereby declare that the proposal contained in the Notice of Proposed Rule Making will have a significant environmental impact as evidenced in the numerous recorded instances of bird kills associated with the placement of television and radio towers in the flight paths of migratory birds.

Furthermore, we the undersigned declare that the preemption of state and local land use and zoning ordinances will exacerbate the problem of bird kills at radio and television towers due to the lack of consideration of the environmental effects of said towers on migratory birds.

We hereby request that the Federal Communications Commission begin an Environmental Impact Statement as requested by the National Audubon Society to fully explore the effects of the proposal announced by the Notice of Proposed Rule Making on migratory birds and their habitats.

Yes! I want the FCC to do an Environmental Impact Statement.

Please sign your name and address below to tell the FCC to do an Environmental Impact (EIS) for their proposal to preempt state and local zoning and land use ordinances in the siting of television and radio towers.
